The American people are more willing to spend all of the money necessary to win the war. They do expect, however, reasonable economy and efficiency. In the first three years of its participation in the Great War, Great Britain spent in round numbers \$40,000,000,000. Its expenditure for the current year is estimated at \$14,000,000,000. In the first year of the war the American Congress appropriated \$21,000,000,000 for war expenditures. For the current fiscal year, which will end June 30, 1919, the estimate from various departments for war expenditures will aggregate \$24,000,000,000. Congress has already appropriated \$29,000,000,000, and the ad-

ministration now estimates that \$7,000,000,000 will be required.

The Democratic slogan of "Help Wilson win the war" evidently failed to impress the Kansas soldiers in the training camps of the United States. In the August primary returns received from the cantonments gives the Republican candidates for senator 2687 votes as against 1,092 for Democratic candidates for the same office. The soldier is not afraid to trust his welfare to a Republican Congress. In fact, his vote shows that he prefers such a Congress.
